

JAY PANCHAL

Data & BI Analyst

+1 (437) 430-5325 | Toronto, ON | panchaljay0808@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data and BI analyst with 2.5+ years across the full analytics stack: extracting data via APIs and SQL, modeling it into SQL Server warehouses, and delivering governed Power BI dashboards with DAX. Honours post-graduate credential in Data Analytics. Replaced approximately 20 hours per week of manual reporting with an automated 45-minute refresh and lifted recurring-report accuracy above 95%. Strongest where operations and inventory meet analytics, owning pipelines end to end: ingestion, warehousing, semantic modeling, dashboarding, automation, and data quality.

CORE COMPETENCIES

- **BI & Reporting:** Power BI (DAX, Power Query/M, RLS, scheduled refresh, data gateways), SSRS, Tableau, Excel (advanced: pivot tables, lookups, VBA)
- **Databases & SQL:** SQL and T-SQL (CTEs, window functions, stored procedures, MERGE/UPSERT, performance tuning), SQL Server Management Studio (SSMS), star-schema warehousing
- **Data Engineering:** REST API integration, JSON-to-relational transformation, deduplication, SQL Server Agent and Task Scheduler automation, Databricks (PySpark, Delta Lake), Snowflake, Azure fundamentals
- **Data Quality & Governance:** source-to-target validation, reconciliation logic, anomaly detection, KPI governance, data lineage, data dictionaries, runbooks
- **Domain (Operations & Inventory):** inventory and stock-health analytics, operations and production reporting, supply-chain KPIs, vendor performance analysis

WORK EXPERIENCE

Operations & Inventory Analyst

May 2025 - Present

MVR Cash & Carry

- Own inventory and stock-health analytics across 1,000+ SKUs, tracking stock levels, expiry, and shrinkage to drive replenishment for 12+ monthly purchase orders; reduced expired inventory by 15%.
- Analyze SKU velocity and vendor performance across 10+ suppliers, recommending order adjustments that improved shelf efficiency and cut waste.
- Rebuilt weekly reporting from raw MS Access and Excel exports into a standardized stock-health dashboard, giving managers current visibility in place of ad-hoc pulls.

Data Analyst, Systems Integration & Real-Time Analytics

Jul 2024 - Dec 2024

The Michener Institute of Education at UHN

- Built a Python, SQL Server, and Power BI pipeline that replaced approximately 20 hours per week of manual reporting with an automated 45-minute refresh, giving leadership a single source of truth for KPIs.
- Engineered Python ingestion of Zendesk's API with pagination, rate-limit retries, and deduplication, loading 5+ years of data into a governed star-schema warehouse.
- Modeled a DAX semantic layer surfacing SLA compliance, backlog aging, response and resolution times, and productivity across 5 dashboards.
- Automated refresh via SQL Server Agent and built data-quality checks, reconciliation, and anomaly detection, cutting ad-hoc clarification requests by 30%.

Data Analyst, Operations & Automation

Aug 2021 - Mar 2023

Group Bayport

- Sourced and transformed EAV-model SQL data into analysis-ready reporting for operations, production, and customer-experience teams across 5 e-commerce brands.
- Standardized KPI definitions and join logic across brands, lifting recurring-report accuracy to 95%+ and reducing month-end rework by 20%.
- Built Excel and Power Query dashboards that surfaced variance drivers and automated recurring report delivery with scheduled SQL jobs.

EDUCATION

- Postgraduate Certificate, Data Analytics - Durham College, Toronto | 2024 | GPA 4.58, Dean's Honour Roll
- Postgraduate Certificate, Project Management - Fleming College, Toronto | 2023 | GPA 3.90, Dean's Honours
- B.E., Mechanical Engineering - Silveroak College of Engineering, India | 2015-2019
